

### **Additional Information**

It's been a privilege to have been YOUR Altone Ward Councillor for the last 6 years. In ALL that time I have challenged the unnecessary spending of \$millions of ratepayers money & voted against rate increases. All my speeches AGAINST rate rises & FOR improvements in OUR SUBURBS are available on the public record.

I have been involved in community groups all my adult life. I am committed to listening & staying connected to the people in OUR suburbs. I have worked with groups in Bennett Springs, Lockridge, Dayton and Brabham. OUR suburbs are better and stronger when local people like you get involved in consulting with decision makers because you know what is BEST for you, your communities and your suburbs.

I am also committed to ensuring that we get the right balance between development and conservation so that our children & grandchildren will live in an environment that is rich in life and history with healthy air, water and land. Balancing outcomes for a robust economy with employment opportunities and the need to retain bushland and biodiversity will be a future challenge for the City of Swan as already much of our natural environment has been lost. Hard decisions will need to be made.

I am a Solicitor working at a local community legal centre & have been a Swan resident/ratepayer for over 30 years. I read the paperwork & ask the right questions. I'm totally independent of political parties. On your behalf I'm not afraid to say what must be said & do what must be done. I answer to no-one other than YOU who determine my decision making.

If elected I will listen, keep working and fighting for YOU & YOUR community. To Stop waste, Keep them honest and get the results YOU want - improved parks & environment, well maintained streets, footpaths, verges & roads, traffic calming, drainage & parking solutions, better safety & security, sensible planning & waste collection & NO rate rises. My vote NO keeps YOUR rates LOW! Vote Jennifer Catalano- Your best choice
