

Additional Information

I have been active in every community I have lived in, whether it was in Scotland before I moved to Australia in mid 90's or Bassendean before I moved here. I have always believed that whilst we may love where we live, there is always room for improvement. This is one of the reasons I ran for Parliament in 2021 and became a Member of the Legislative Council. One of the strongest things I learned from being an MP was how important it is that Local, State & Federal Government all work together to bring positive changes to the community. The new Swimming & Sports Centre is a great example of that. I also learned that it is extremely important to work with others of differing views and get solutions to improve what we have.

Our whole area has changed significantly over the years. Multiple housing developments across Aveley, Bullsbrook & Ellenbrook have altered the landscape but not always for the better. There are issues with modern cars not fitting on driveways, pavements but lack of safe crossings for children to get to school, nature playgrounds but not all ability ones. We need to protect our areas with CCTV in public areas, create opportunities for employment in the area and ensure our young people have safe places to hang out. We need to cherish and enhance what makes our diverse community special.

I believe that with my experience I would serve the Pearce Ward and the people of the City of Swan well.

Thank you
